

# Feedback Form

## Hybrid Integration Project – January 27, 2022

### Feedback Provided by:

Name: Justin W. Rangooni

Title: Executive Director

Organization: Energy Storage Canada

Email: [jrangooni@energystoragecanada.org](mailto:jrangooni@energystoragecanada.org)

Date: February 17, 2022

Following the January 27, 2022 webinar on the Hybrid Integration Project, the IESO is seeking feedback from participants on the proposed “day-in-the-life” for the foundational hybrid facility models, including any concerns from a participation perspective, as well as any dependencies between resources or technologies the IESO should be accounting for.

The referenced presentation can be found under the January 27, 2022 entry on the [Hybrid Integration Project webpage](#).

**Please provide feedback by February 17, 2022 to [engagement@ieso.ca](mailto:engagement@ieso.ca).** Please use subject: *Feedback: Hybrid Integration Project*. To promote transparency, this feedback, if provided in an AODA-compliant format (e.g. using this form) will be posted on the [Hybrid Integration Project webpage](#) unless otherwise requested by the sender.

Thank you for your time.

## Day-in-the-life Participation

Topic	Feedback
Did you see any concerns from a participation perspective for co-located or integrated facilities?	At this stage we do not have any concerns with respect to participation. We look forward next stage of discussion related to high-level design.
Are there any dependencies between resources or technologies that make up the hybrid models that the IESO should be accounting for?	We are not aware of any dependencies at this time.
Please indicate if you would like to set up a one-on-one call with the IESO team to discuss specific participation questions.	ESC does not have further questions at this time; we would appreciate the opportunity for a group meeting with our members following the completion of the high-level design.

## General Comments/Feedback

ESC is supportive of IESO's foundational models recognizing that they leverage existing tools and processes such that hybrids will be enabled for the first LT RFP. We also appreciate the 'day-in-the-life' approach to review the concepts in more detail. IESO has incorporated stakeholder feedback into the design and optionality for the two models.
